THE BEAUTY OF WOOD WITHOUT THE MAINTENANCE

Achieving the look of wood without the maintenance, Linetec offers decorative, wood grain finishes for architectural aluminum products. The finishes are available in a variety of different options, colors and species.

These colors are reproduced as closely as possible to the actual wood grain finishes and are to be used only as a guide.

Linetec has selected the following AAMA-2604 texture wood grain finishes as our standard palette, however we can provide other wood grain, marble, granite, or custom designs for you.
